EDUCATION

Vellore Institute of Technology

Aug 2023 – Jul 2027

B.Tech in Computer Science and Engineering

CGPA: 9.36

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Software Engineering

TECHNICAL SKILLS

Languages: C++, Java, Python, TypeScript, SQL

Backend & Distributed Systems: Node.js, Express.js, FastAPI, REST APIs, Microservices, RabbitMQ, Apache Kafka, Socket.IO

Databases & Cloud: PostgreSQL, MongoDB, Redis, AWS, Docker, Git, Linux

AI/ML: PyTorch, TensorFlow, Scikit-learn, XGBoost, SHAP, OpenCV

Generative AI: RAG, LangChain, LangGraph, LangSmith, MCP, Hugging Face, FAISS, ChromaDB

EXPERIENCE

Physics Wallah – AI Engineer Intern (Remote) [Internship Letter](#)

Mar 2025 – Aug 2025

- Designed and developed **NutriBaba**, a production-ready AI-powered nutrition platform using **FastAPI, PostgreSQL, Redis, AWS, RAG, LangGraph, and Multimodal LLMs** for personalized nutritional analysis and conversational assistance.
- Engineered scalable backend services and modular API pipelines integrating **5+ MCP servers**, enabling nutrition analysis, recipe recommendations, grocery planning, fitness tracking, and persistent user memory.
- Developed a multi-agent orchestration framework with specialized **Nutrition, Health Reasoning, Memory, and Explainability Agents**, optimizing context-aware decision making, retrieval workflows, and evidence-grounded responses.

PROJECTS

NomNom – Distributed Food Delivery Platform [GitHub](#)

Fall 2025

- Architected a **microservices-based food delivery platform** using **Node.js, TypeScript, MongoDB, RabbitMQ, Socket.IO, and REST APIs**, enabling secure authentication, asynchronous event-driven communication, and real-time order tracking.
- Implemented **geospatial restaurant discovery, intelligent rider dispatch, dual payment gateway integration (Stripe & Razorpay), and distributed order orchestration**, improving scalability, fault tolerance, and service modularity.

ProHire Nexus – Distributed Recruitment Platform [GitHub](#)

Spring 2025

- Built a **microservice-based recruitment platform** using **Next.js, Express.js, PostgreSQL, Redis, Apache Kafka, and TypeScript**, supporting distributed authentication, job management, resume processing, and recruiter workflows.
- Developed **Kafka-driven asynchronous notification pipelines, Redis-backed caching, Razorpay payment integration, AI-powered ATS resume analysis, and secure RESTful APIs**, emphasizing scalable backend architecture and production-ready engineering.

SATzillaX – Conflict-Driven Clause Learning SAT Solver [GitHub](#)

Fall 2024

- Developed a high-performance **C++17 Conflict-Driven Clause Learning (CDCL) SAT Solver** implementing **VSIDS, 1-UIP Conflict Analysis, Two-Watched Literals, Phase Saving, Geometric Restarts, and Non-Chronological Backtracking**.
- Optimized **Boolean Constraint Propagation, clause learning, heuristic search, and DIMACS CNF parsing**, reducing search space and improving solver performance on complex satisfiability benchmarks.

ACHIEVEMENTS

- Solved **1150+ algorithmic problems** across LeetCode, Codeforces, GeeksforGeeks, HackerRank, and AtCoder; ranked among the **Top 7.51% globally on LeetCode** (800+ solved) and achieved a **Codeforces Rating of 1389**.
- Secured **2nd Place** in the Bolt 2.0 Hackathon (Freshers Category, 2024).

CERTIFICATIONS

Machine Learning Specialization (Andrew Ng)

IBM Advanced Generative AI Professional Certificate

LEADERSHIP & ACTIVITIES

- Mentored **50+ participants** in astrophotography during **Cosmic Walk 3.0** as part of VIT Stellar.
- Selected for an exclusive **1-on-1 Lightning Session** with **Praveen Jayakumar**, Technology Head – Generative & Agentic AI, AWS, at **AWS Summit Mumbai 2026** on building production-ready Agentic AI systems.
